GOosafe in IVF Laboratories

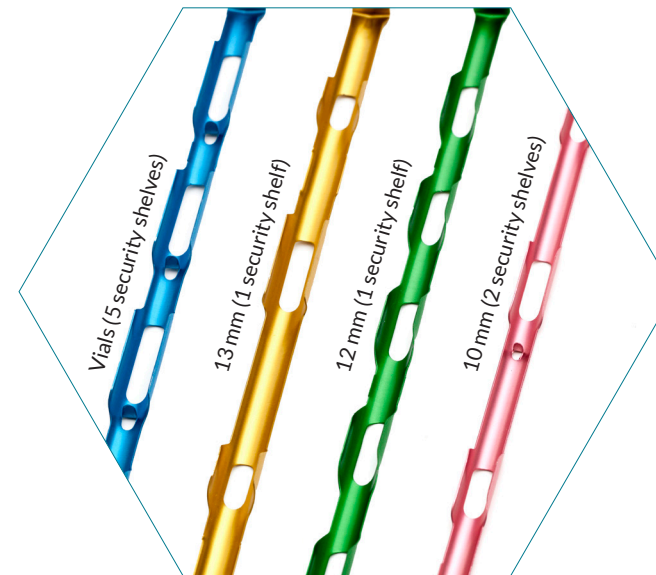

OOSAFE® CRYOWARE

DESIGNED TO MAKE EMBRYOLOGISTS' AND BIOLOGISTS' ROUTINE CRYO JOBS EASIER, FASTER AND SAFER.

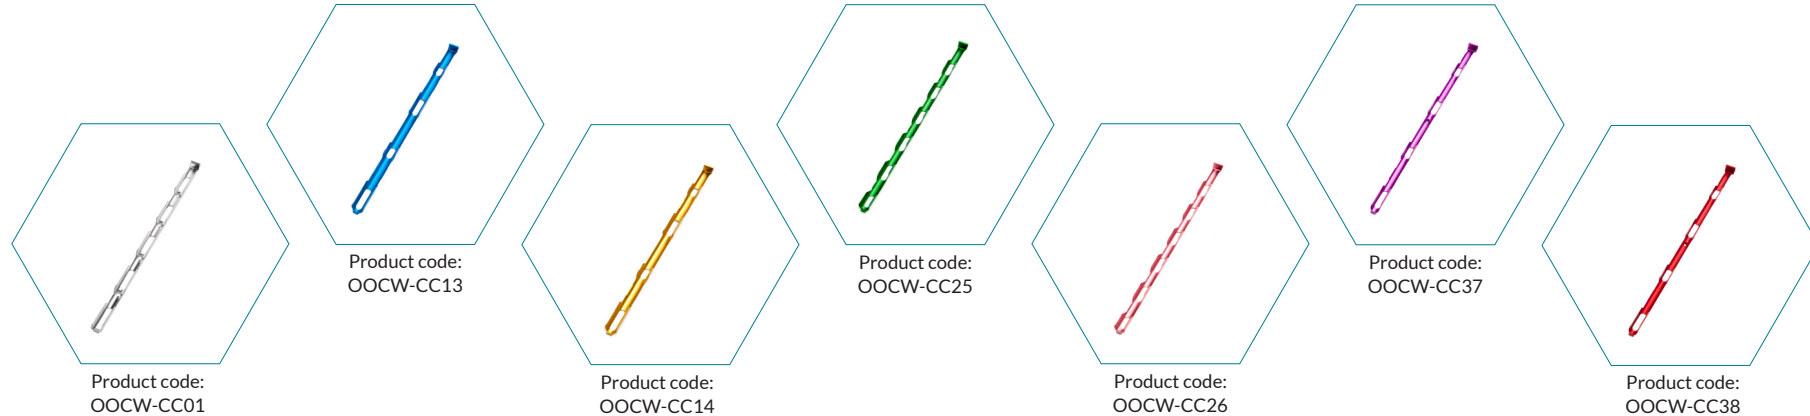

OOSAFE® COLOR CANES

Oosafe® Color Canes are designed for safely storing cryo vials and straws inside goblets (visotubes). Unlimited and unique ID combinations can be made for the stored samples together with different colors of goblets and printed tags. This great feature helps to differentiate each patient's samples in LN₂ tanks and minimizes the risk of mix-ups.

The whole range of canes is made of aluminum and it is safe to use for IVF and other cryo applications. There are different types of canes to be used with different sizes of goblets and 1-2 ml cryo vials.

ORDER INFORMATION

Oosafe® Color canes for 1-2 ml vials with 5 security shelves, pack of 50 pcs. Holds 5 pcs of 1-2 ml cryo vials

OOCW-CC01 Alu OOCW-CC03 Blue OOCW-CC04 Gold OOCW-CC05 Green OOCW-CC06 Pink OOCW-CC07 Purple OOCW-CC08 Red

Oosafe® Color canes for 13 mm diameter goblet (visotube) with 1 security shelf, pack of 50 pcs. Holds 1 pc of 13 mm diameter goblet (visotube)

OOCW-CC11 Alu OOCW-CC13 Blue OOCW-CC14 Gold OOCW-CC15 Green OOCW-CC16 Pink OOCW-CC17 Purple OOCW-CC18 Red

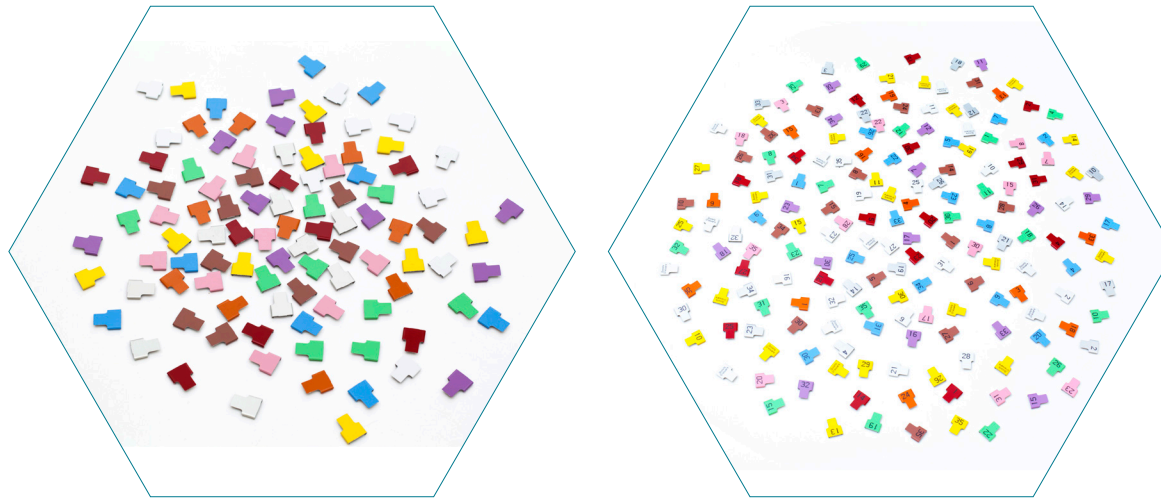

Oosafe® Color canes for 12 mm diameter goblet (visotube) with 1 security shelf, pack of 50 pcs. Holds 1 pc of 12 mm diameter goblet (visotube) or 6 pcs of 1-2 ml cryo vials

OOCW-CC21 Alu OOCW-CC23 Blue OOCW-CC24 Gold OOCW-CC25 Green OOCW-CC26 Pink OOCW-CC27 Purple OOCW-CC28 Red

Oosafe® Color canes for 10 mm diameter goblet (visotube) with 2 security shelves, pack of 50 pcs. Holds 2 pcs of 10 mm diameter goblets (visotubes)

OOCW-CC31 Alu OOCW-CC33 Blue OOCW-CC34 Gold OOCW-CC35 Green OOCW-CC36 Pink OOCW-CC37 Purple OOCW-CC38 Red

OOSAFE® CRYOWARE

OOSAFE® PRINTED & NON-PRINTED TAGS FOR CANES

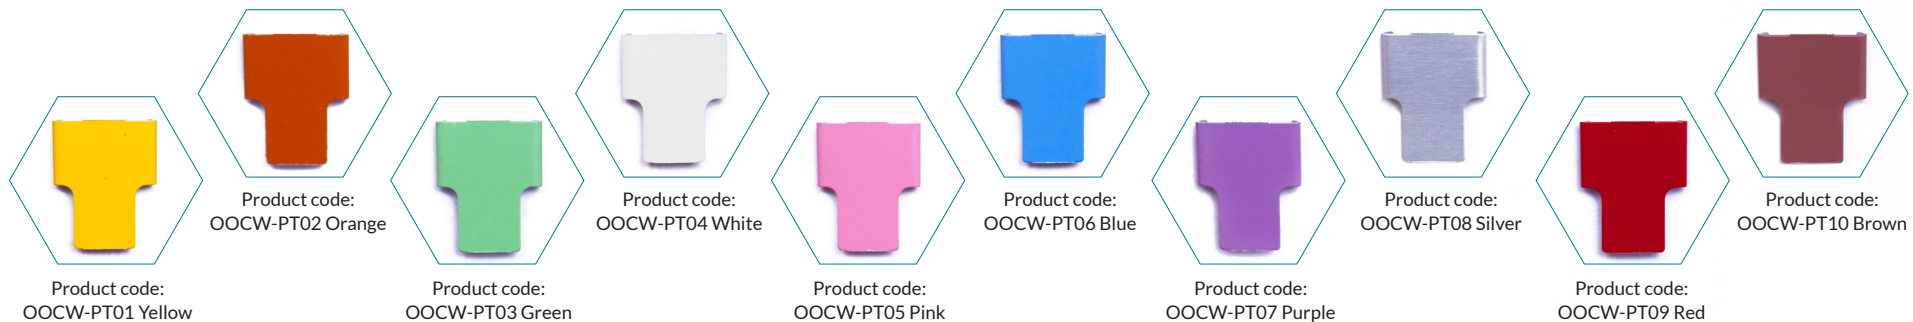

The whole range of colored printed & non-printed ID Tags are made of aluminum and are safe to use for IVF, as well as other cryo applications.

Our prints on tags are durable and permanent, unlike handwritten tags with permanent cryo marker pens. This feature makes our tags the safest choice for storage inside LN₂ tanks.

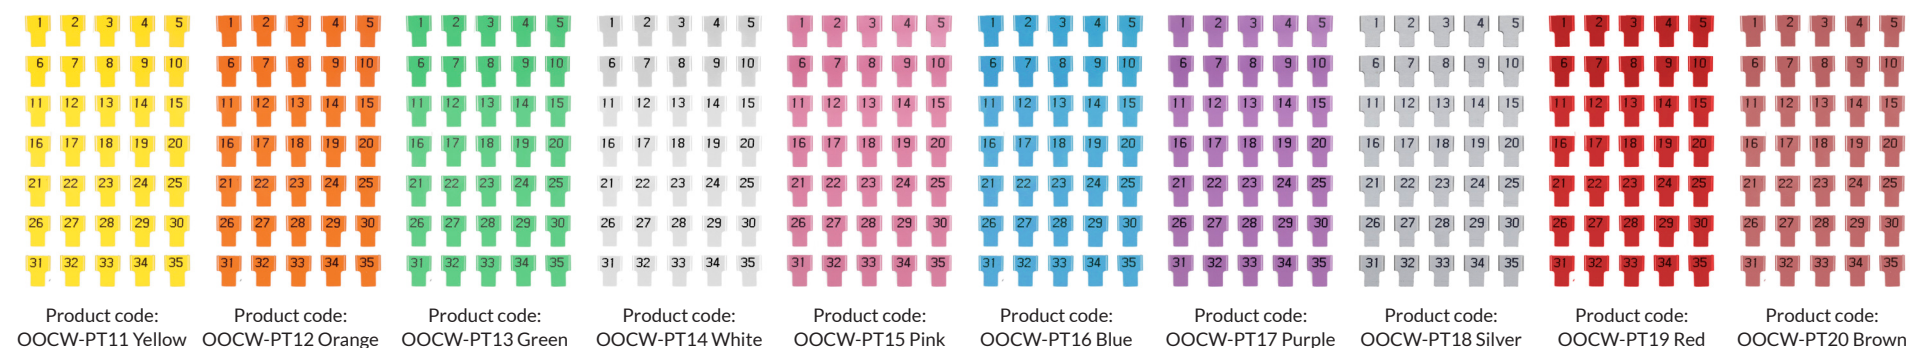

Our standard printed tags are numbered from 1 to 35 but printing can also be customized. Please contact SparMED regarding the minimum purchase order required for customized printed tags.

ORDER INFORMATION

OOSAFE® NON-PRINTED TAGS, PACK OF 50 PCS

OOSAFE® PRINTED TAGS, PACK OF 35 PCS

OOSAFE® CRYOWARE

OOSAFE® SLEEVES FOR CANES

The unique transparent color design provides security and visibility while handling and storing cryo vials and goblets (visotubes) in the liquid nitrogen tank.

The different colors allow the user to separate or group patients' samples, as well as to locate them faster inside LN₂ tanks.

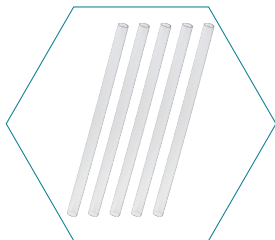

The slightly smaller diameter, compared to existing sleeves on the market, allows usage of cryo canes with both 12 mm and 13 mm diameter goblets (visotubes) and take up less space inside LN₂ tank canisters.

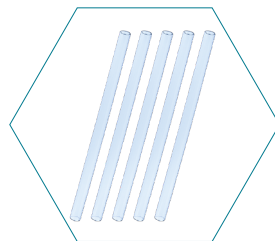

Oosafe® Cryoware
manufactured according
to ISO 13485 Quality
Management System
